§ 01 PROFILE

Full-stack TypeScript engineer with four years shipping production web & mobile systems for US logistics, HR and fintech operators. Comfortable owning a feature end-to-end – frontend, backend, infrastructure and deploy – with agentic AI woven into the day-to-day: I build the tooling, run self-hosted inference, and agents handle the typing while I drive architecture, review and integration.

§ 02 SKILLS

LANGUAGES TypeScript · JavaScript · SQL · HTML / CSS	FRONTEND React · Next.js · Vue / Nuxt · React Native [Expo] · Tailwind · MUI · Ant Design · Radix · TanStack Query / Router · Zustand · Redux Toolkit · MobX	BACKEND Node.js · NestJS · Fastify · Express · PostgreSQL · Prisma · Sequelize · Redis · BullMQ · Socket.IO · WebSockets

§ 03 EXPERIENCE

ETL GROUP LLC Full-stack Software Engineer · Remote – US logistics <i>Lead / sole developer across a suite of products for US freight carriers and dispatchers.</i> - ClaraHR – AI-powered driver onboarding system which contacts, onboards and files US truck drivers in the carrier's system with minimal HR involvement. Lead the project end-to-end, including infra and B2B communication. Onboarded 800+ drivers across 8 enterprise clients. - CargoHub – public freight marketplace where shippers and brokers browse carriers' trucks, post loads and book capacity, with an in-product AI assistant handling routine dispatch. Sole developer. Handles ~2,500 trucks across 9 carriers. - CargoFinance – accounting & light-fintech tooling for a logistics back-office: invoicing, transfer tracking and bank-rail payouts (AP/AR, reconciliation). Sole developer. - CargoETL – closed TMS; built and maintain both the Next.js dispatcher dashboard and the React Native [Expo] driver app – order flow, live tracking, documents and dispatch comms.
